

Your Personal VOICE-ACTIVATED COMMAND CENTRE

This patented process's application harnesses the power of voice recognition to provide immediate help when you are unable to activate a panic button or manually access an app.

Valor's app design prioritizes simplicity and speed. There's no need to unlock your phone or launch any applications—all it takes is your voice.

VOICE ACTIVATED

Valor is tailored to use your voice to activate a panic signal. Manual panic activation is also available.

PIN POINT GEO-LOCATION

The closest response vehicle is navigated to the exact GPS location of the user, resulting in greater response accuracy.

ARMED AND EMERGENCY RESPONSE

On-demand Armed Security and other response services are dispatched to your exact location in real time.

BANK FRAUD NOTIFICATION

Panic mode notifies your bank that your account has been compromised.
